Quick start

You can also visit INFTYLAB Glide for the online guided setup.

M Mouse Quick Start Guide

Power on the mouse

1. Slide the power switch to turn on your mouse.
2. The front status light glows solid blue for 5 seconds.

Connect to your computer

Choose how you want to connect your mouse:

Connect with the USB receiver

1. Plug the USB receiver into a USB port on your computer.
2. Press the switch button to select the USB receiver connection light.

3. The light glows solid blue for 5 seconds when successfully connected.

Connect with Bluetooth

1. Press and hold the switch button for 3 seconds until the connection light blinks rapidly.
2. Open Bluetooth settings on your computer and select INFTYLAB M Mouse.
3. The light glows solid blue for 5 seconds when successfully connected.

Customize your mouse

Go to [web-URL.com] in your web browser to configure your initial settings.

To unlock deeper customization, including button remapping and advanced tracking, follow the on-screen prompts to download the INFTYLAB Glide app for macOS and Windows.

Connections

Wireless connections

You are provided with 2 ways of wireless connections.

Connecting USB receiver

1. Connect the USB receiver to your computer by the supplied USB cable.
2. Switch to  mode from the bottom of the mouse.
3. Check if the signal is stable by the LED indicator on the receiver. If the LED indicator is flashing amber, move the receiver or mouse within the effective range until the LED indicator turns white.

Signal stability (when using 4K enhanced receiver)

LED status		Connection status
	Dim white	The mouse is properly connected.
	Flashing amber	• (During mouse operation) The signal is not stable. • (When the mouse is inactive/off) The mouse is going to be disconnected.
	Solid white	The mouse is not connected.
	Off	The receiver is in standby mode as the mouse is not connected.

① Tips

- Keep the mouse and the receiver aligned in the center for optimal performance.
- For optimal performance, use the mouse approximately 20 cm away from the receiver at an angle of 50 degrees (left and right). This is for reference only. Check the LED indicator for signal stability.
- Keep the receiver at least 50 cm away from other possible signal interference such wireless routers.

Connecting via USB receiver

1. Connect the USB receiver to your computer.

To ensure stable connectivity, use the supplied extension adapter (USB adapter) and USB cable to extend the distance of USB receiver.

2. Switch to  mode from the bottom of the mouse.

① Tips

- For optimal performance, use the mouse within a range of 20 cm of the USB receiver approximately. This is for reference only.
- Keep the receiver at least 2 meters away from other signal interference such wireless routers.

Wired connection

Connect the mouse to your computer using the supplied USB cable.

① Note

Regardless of the mode switched from the bottom of the mouse, the mouse is switched to wired operation and starts charging when it is connected to PC via the USB cable.

Check battery status

You can check the battery level and charging status by looking at the status light on the front of the mouse.

LED status	Description
Solid red	Low battery (20% or less)
Breathing blue	Charging
Solid blue	Fully charged
Flashes red 5 times	Charging error

Note

The status light remains off during normal operation and will only illuminate when the battery is low.

Charge your mouse

Use the supplied USB cable to charge the mouse. During charging, refer to the front center power LED indicator for the current charging status.

A minimum of [3 minutes] charging gives you enough power for a full day of use. Depending on how you use the mouse, a full charge can last up to [70 days]*.

① Tips

The power LED indicators do not light up during mouse operation until the battery power is very low. To manually check power level, see

Charging time and battery time

It takes about 2 hours to fully charge the mouse.
Battery time of a fully charged mouse varies by polling rate.

Polling rate	Battery time (with constant movement wirelessly)
--------------	---

Care and maintenance

Cleaning

- Dust or debris on the sensor can affect tracking performance. Gently clear the area using a clean, dry brush.
- To clean the exterior of your mouse, wipe it with a soft, lint-free cloth. Avoid getting moisture in any openings, as liquid on the sensor can cause tracking issues.

Storage

If you are traveling with your mouse or storing it for a long period, pack it carefully to prevent damage to the components:

1. Slide the power switch to turn off your mouse.
2. Disconnect the USB cable completely from both your computer and the mouse.
3. Use a cable tie to gently organize the cable, avoiding tight bends that could damage the connector.

Specifications

Item	Description
Product name	INFTYLAB M Mouse PS01
MSRP	\$99.99
Ergonomics (size)	Comfortable for small to medium hand sizes
Weight	85 g
Buttons	• Left click • Right click • Side button • Side scroll wheel • Middle button
Scroll wheel	Hybrid: Clicky / Smooth automatic switching
Battery	Rechargeable lithium battery, 500mAh (USB-C charging)
Connectivity	• Wireless: 2.4G, Bluetooth • Wired: USB Note: The mouse is switched to wired operation when it is connected to PC via the USB cable.

Item	Description
Sensor	Suitable for glass surfaces
Polling rate	• Wired/2.4G: 125Hz / 500Hz / 1000Hz • Bluetooth: 125Hz
DPI range	400 to 6000 (default 1100)
Number of connected devices supported	4
Mouse function settings	• Online software: Basic settings • Offline software: Advanced settings (for macOS & Windows)
